

SCIENCE @ LICKEY

Materials Testing In Progress

KS1 became the Material Testing Lab this half term as they tested the strength, flexibility, bounciness and stretchiness of objects. LB1, meanwhile, have been looking at weather and cooked up a rainstorm, rainbows and clouds in the classroom! The highlight of Reception's term of science was meeting Ellie, the school's skeleton!

“ The best part of science is when we do experiments because they inspire me. ” y4

Mars, Cars and Magnetic Bars

Years 4 and 6 have completed their electricity topics. Year 6 particularly enjoying making electric-powered cars while Year 4 have learned about scientist Alessandro Volta and recreated his electrical experiments that resulted in his invention of the battery. Year 3 have been looking at forces, including testing how

the Egyptians moved stones and exploring magnetic poles. Meanwhile, LB2 have been investigating sound, including conducting a noise survey of the whole school. Finally, Year 5's space topic came to a close as they analysed samples of "Martian" soil as well as investigating the formation of craters.
